It's Simple by Design for Architects & Designers

As an architect or designer, you strive to specify products that are cost-effective, durable, long-lasting, and great-looking. And with the growing demand to use environmentally responsible, sustainable products and processes, it can be even more challenging to select the right products for your projects.

Flexmar polyaspartic coatings and sealers have been designed with all of these factors in mind to simplify the decision-making process. Whether you need a high-performance coating for a high-traffic, high-abuse commercial area, or a beautiful, eye-catching hard-surface floor treatment for an entryway, lobby, or outdoor entertainment area, Flexmar has the right product for the job!

Performance

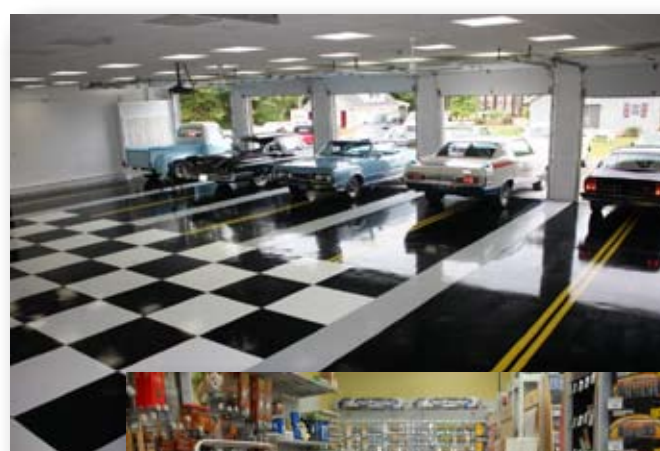

Your clients expect the best, and you demand superior products. Whether you are designing for new or existing construction, residential or commercial occupancy, indoors or outdoors areas, decorative or utilitarian use, Flexmar has the hard-surface floor coating for you.

All of our products are up to four times more durable than epoxies and other coatings systems, are impervious to chemicals, oils, kerosene, gasoline, food spills . . . even mild acids. They are scratch and chip resistant. And the color won't yellow or fade with exposure to sunlight. You can specify our products knowing that your clients will be more than pleased with the long-term performance of their Flexmar floor!

Flexmar Coatings is a member of the U.S. Green Building Council, and our coatings and sealers can contribute toward satisfying credits in the Indoor Environmental Quality and Materials and Resources categories under the LEED program.

From surface preparation, to application, to return-to-service, and beyond, Flexmar polyaspartics offer significant reductions in materials waste, energy consumption, air contaminants, and materials use or waste from required maintenance and cleaning over the life of the concrete surface. Flexmar polyaspartic coatings are low- to no-odor and compliant to 0 VOC. They can even extend the useful life of existing floors, which reduces wasteful removal and replacement.

Flexmar Coatings is the original company to formulate and manufacture polyaspartic floor coatings for one-day-applied residential garage floors, commercial concrete floors, and decorative concrete. Our staff has concrete coatings experience and expertise unmatched by any other polyaspartic coatings company, and our coatings are backed by stringent quality control measures. We understand every facet of the application, from proper substrate preparation to coating chemistry to proper care . . . and everything in-between. This helps to ensure a successful application the first time, every time.
